

Candidate Information

Position:	Research Fellow
School/Department:	School Office (Pharmacy)
Reference:	21/109203
Closing Date:	Monday 11 October 2021
Salary:	£34,304 - £ 40,927per annum
Anticipated Interview Date:	Thursday 21 October 2021
Duration:	Fixed Term Contract to September 2022

JOB PURPOSE:

To be an active member of the research team assisting in the development and pre-clinical and industrial translation of novel microarray patch delivery systems. To assist in the planning and delivery of this research activity so that the overall research objectives of the project are met.

MAJOR DUTIES:

1. Design, develop, prepare and fully evaluate hydrogel-forming and dissolving microneedles.
2. Prepare documentation for meetings with regulatory authorities, industrial and clinical partners.
3. Design, develop and refine experimental apparatus and analytical methods in order to obtain reliable data.
4. Carry out in vivo animal experiments, analyses, critical evaluations, and interpretations using appropriate methodologies and techniques. Such techniques will include high performance liquid chromatography, mass spectrometry, ultraviolet and fluorescence spectroscopy.
5. Present regular progress reports on research to members of the research group or to external audiences to disseminate and publicise research findings.
6. Prepare, in consultation with supervisor, material for publication in national and international journals and presentations at international conferences.
7. Assist supervisor in the preparation of funding proposals, submissions to pharmaceutical/medical devices companies and applications to external bodies.
8. Carry out routine administrative tasks associated with the research project to ensure that the project is completed on time and within budget. These might include organisation of project meetings and documentation, financial control, risk assessment of research activities.
9. Carry out occasional undergraduate supervision, demonstrating or lecturing duties within the post holder's area of expertise and under the direct guidance of a member of academic staff.
10. Read academic papers, journals and textbooks to keep abreast of developments in own specialism and related disciplines.

ESSENTIAL CRITERIA:

1. Applicants must have a degree in Pharmacy, Pharmaceutical Sciences, Chemistry, Engineering or a closely-related discipline (Minimum standard 2.1).
2. Have, or about to obtain, a PhD in drug delivery/pharmaceutics.
3. At least 3 years recent relevant research experience to include, experience in pharmaceutical analysis, including HPLC.
4. Knowledge of mass spectrometric detection as used in combination with HPLC Experience of formulation science.
5. Experience of design and manufacture of polymeric microneedles.
6. Experience of conducting in vivo animal experiments to evaluate dosage forms.
7. Ability to contribute to administration relevant to the research.
8. Liaison with external collaborators and sponsors.
9. Practical problem-solving skills, independence of thought and initiative.
10. Ability to present scientific arguments and data in a clear, concise and confident manner in both written and oral formats.
11. A composed and conscientious scientist, able to work in a disciplined manner within a team environment.

DESIRABLE CRITERIA:

1. A UK certificate in animal handling.
